Education

University School of Information, Communication and Technology — Delhi, India
Bachelor of Technology in Information Technology — *September 2023 – June 2027*
CGPA: 9.04/10

Skills

Programming Languages	C, C++, Java, Python, Go, JavaScript, TypeScript
Frontend	HTML5, CSS3, React.js, Next.js, Zustand, RTK, Axios, TailwindCSS, Shadcn, Bootstrap
Backend & Databases	Node.js, Express.js, FastAPI, Socket.io, Redis, PostgreSQL, MongoDB, Prisma ORM
Tools	Git, Github, Github Actions, Docker, n8n, Supabase, Cloudinary, Antigravity(IDE)

Work Experience

Venwiz Technologies — Bengaluru, Karnataka (Remote)
Software Engineering Intern — *June 2026 - Present*

- Built an internal CMS dashboard from scratch (**React, Redux, TypeScript, NestJS**) with role-based access control and a safe rollback mechanism for project-tracking data, on a platform used by enterprise clients including **L&T, BPCL, CtrlS and Thermax**.
- Shipped an end-to-end notes and tagging system (SendGrid automated email alerts) that became the platform's primary tool for cross-team collaboration.
- Built a backend service (NestJS) integrating the **Google Docs API** to auto-generate formatted site-visit reports on demand, including the underlying data schema and migration to support it.
- Identified and fixed a security vulnerability in document access by replacing unsigned download links with signed, time-limited URLs (**AWS CloudFront**).
- Owned a core vendor-management module end-to-end (**React, TypeScript**): unified multiple related views, migrated state management to **Redux**, and eliminated duplicate network requests across 5+ components.

ChalksnBoard — Gurugram, Haryana (Hybrid)
Software Developer Intern — *January 2025 - May 2025*

- Owned the end-to-end frontend product lifecycle for FindMySchool.net, designing complete **UX-UI wireframes** and engineering the client-side components in **React.js** and **Tailwind CSS** to support successful onboarding for **3,000+ schools**.
- Architected the backend system flows and **DB Schemas**, collaborating with developers to implement a robust, multi-role administrative controller layer using **Java Spring Boot**
- Designed real-time **API contract** definitions and structured webhook listeners to integrate **Razorpay**, ensuring secure transactional validation for high-volume fee payments.

Projects

AlgoWars | Real-Time Competitive DSA Platform — Live Demo GitHub

- Designed and deployed a high-concurrency, **real-time 1v1** competitive coding engine utilizing **Socket.io** for state synchronization and **WebRTC** for low-latency peer connectivity.
- Implemented an optimized matchmaking system backed by **Redis** queues and automated caching
- Developed the database schema using **PostgreSQL(Prisma ORM)** to track user analytics, gamified XP, and persistence strategies for matching metrics.

LinkSlam | Full-Stack Link Sharing Platform — Live Demo GitHub

- Built a social link-sharing platform with dashboards and community discovery using **Next.js**, **React**, and **TypeScript**.
- Implemented public/private links, search with tags, and dashboards backed by **Node.js**, **Express**, and **MongoDB**.
- Integrated secure authentication using **Passport.js (Google OAuth)** and **JWT**, with media uploads via **Cloudinary**.

Meme Aunty | AI-Powered Meme Generator — Live Demo GitHub

- Constructed an image-processing backend using **FastAPI**, integrating **Google Gemini 2.5 Pro** for context-aware prompt engineering, using **PIL** for dynamic text-wrapping and storing finalized outputs to **Cloudinary** storage bucket.
- Prevented API abuse by implementing custom rate-limiting middleware via device fingerprinting and client verification metrics.

Positions of Responsibility

Software Development Cell (SDC) — USICT, GGSIPU
Chairperson — *October 2024 - Present*

- Spearheading university-level projects such as the Training and Placement Cell website, Anugoonj 2026 (Cultural Fest Website) and HashTech 2025, enhancing visibility and engagement across platforms.
- Organized and led the event **"Roadmap 3.0"**, guiding over 350+ students through career pathways in tech, design, and development.
